Trần Việt Hoàng

Developer

I have 1.5 years of experience in participating in real projects, and 1 year in doing freelance tasks. I have 3 months of experience specializing in converting designs from Figma to pure HTML, CSS and JS. With experience and a high learning spirit in the position of Developer, I believe that I can take advantage of my skills to complete the assigned tasks as well as contribute to the development of the company.

Experience

- **Idol Website**
Position: Frontend dev
 - Using Nuxtjs to code web interface with design as Figma
- **Education Game Website**
Position: Frontend dev, Backend dev, Devops
 - Using Phaser as a web game client with figma design
 - Koajs for the backend and ejs for admin page
 - Deploy to sakura server and use nginx to navigate
- **Web app that analyzes components in an image (e.g. plastic)**
Position: Backend dev
 - Use Expressjs to receive photos from clients and use the service provided by the AI team to analyze the images
Position: Frontend dev
 - Use Reactjs to create an interface for users to use
- **Android App to connect camera**
Position: Frontend dev
 - Use react-native to make the mobile app interface interact with the customer-provided backend
 - Use Nestjs to receive images while taking pictures and send them to the server
- **E-commerce**
Position: Backend dev
 - Use expressjs to build sales management service APIs
- **Job Search Management**
<https://github.com/hoang2807/Hiring-Manager>
Position: Backend dev
 - Use nestjs to build APIs to support job management
Position: Frontend dev
 - Use react, antd to build the admin page to manage posting jobs
 - Use Astro, tailwind to build a user page that supports users with features to help search and post CVs
